WORK EXPERIENCE

PRESENT ○ ZERODESKTOP (MERGED WITH NCOMPUTING)

SENIOR UI/UX DESIGNER & MOBILE/WEB DEVELOPER

RX300

- Designed management/client software UI for Raspberry Pi based thin client devices.
- Developed working prototype with Angular 2 to make understanding the UI easier for developers.

vSpace Pro 10

- Redesigned UI for vSpace software family, NComputing's decade-old Windows applications.
- Worked remotely with NComputing development team in Belarus and Poland, to spec out the application and provide design resources.
- Created complete working prototype with HTML, CSS and Angular.

Blocks

- Co-developed the iOS app with one other iOS engineer using Swift, Objective-C, MVVM architecture and ReactiveCocoa framework.
- Brainstormed and designed the UI for the iOS app.

QualityTime & DinnerTime Plus

- Designed and developed the parent app for iOS alone with Objective-C.
- Brainstormed and designed the UI for parental/self controlling apps for Android (QualityTime reached over 1 million downloads).
- Maintaining the code and owning the product as a product manager.

MiiPC

- Designed UI for parental control enabled Android desktop PC for kids, which was successfully funded on Kickstarter.

ZeroPC

- Redesigned iOS and Android app UI for ZeroPC, a meta-cloud service.

DEC 2012 ○ FOMOLA

CREATIVE DIRECTOR, IOS DEVELOPER & UI/UX DESIGNER

- Brainstormed idea and designed UI for Blogsy, one of the first blogging app for iPad and once ranked 32nd on U.S. App Store.
- Programmed UI/front-end code for Blogsy.
